As much as I liked this game, I have to say I am really disappointed by its length. Took me 2 hours to finish it and that's pretty much all there is to it, as there's no replayability whatsoever.

Also, one of the puzzles requires you to cripple a kid/man for life. I know that this is a video game and the characters are fictional, but seriously? That's pretty mean for a protagonist who's trying to save the world from destruction, if you asked me.

Still, Chronology is a solid and colorful platformer with a clever use of the time traveling concept. While controlling the snail, you can also stop time, but I honestly feel it's not used much throughout the game.

I will recommend this game, but I'm not sure about its price tag. It's not that 4,99€ is a lot of money; it's just that I've played many similar puzzle/platformer games with the same price tag that took me a lot longer to finish. Maybe get it while on a discount.. Do not buy. Will not work and the company who supports it no longer exist. Early access, so it looks rather barebones at this point. Needs more of everything. Will wait for release.. Game really reminds me of Bejeweled - In fact it is Bejeweled Twist with the RPG Elements of Square Enix. Its very challenging but you have to go through the tutorial to really understand it , because if you write off this Bejeweled Themed game as a puzzle game with a visual skin slapped on it, you will not win at this game.

There have been people who have not been able to run this game. It has to do with people who don't have very high resolution monitors or their monitor can't support certain resolutions. I've posted a workaround in the forum for this that should work for everyone but it will result in a 640x480 resolution.

. Super recommend this game, simple, light, but very fun. Many thanks for the version for Linux :). A great little strategy game to play in small doses or to grind through all the achievements in an obsessive sprint. The hardest difficulty is, indeed, very difficult and each round can be completed in under half an hour. It takes a lot of planning to succeed, it's cheap, and it's fun. What more could you ask?

This game is a waste of money. It was not fun or interesting to play. It is very simplistic and not well executed. I bought this on sale and still feel cheated.. OMG. Memories. One of the first games I ever played was Boulder Dash on my older brothers C64. Later we played together on the much improved Amiga version of the game. Many years ago I found the PC clone Diamond Caves, but lost it again. Today I found it here on Steam and right now my own kids are playing around with the game and designing levels for each other. This is a new version with many new features but it still very true to the original. Well designed, and well implemented.. Funny Countryball game, Political humor, awesome steam badge and hmm....somehow music is addicting.

Need 10 hours to complete all achievements. I dunno why, but the "Team Meat"-commentary-track really reminded me of "Mystery Science Therther 3000 V Riftrax" and any other comedic-commentary-tracks (especially the folks from Channel Awesome).

I suppose that one good reason to throw in few dollars V euros?

I really don't have anything else add that was already mentioned in the description V sales-text; I still got enough laughts I paid for.. This game is a mess. Could not load in big picture mode. Had to enable controller input in a game championing itself as a coch multiplayer. Multiple A.I issues, random stutters and freezing on a rig with a gtx 1060 and latest generation i5. Putting in for a refund and hopeing that no one falls prey to this game... it is disapointing as it has promise.. lauch napalm over and over and over again while sitting in same spot but then giant red orb of op finds u so you instantly die. grapple away but die to man with easy hold down left click across map beam laser. The original game is superior to this game in several ways. It's disappointing, while there's steps in several areas in terms of graphics and storytelling/cutscenes, some weird decisions were made regarding gameplay changes and enemy placement that don't make sense, mechanics reworked for not a lot of good reason behind it, This, on top of one of the biggest mistakes that a platformer can make; unreponsive controls at times, in particularly with the jump button. That's a major problem, and hits the game at it's core.

Honestly, I love the original, but I can't recommend the remake. Go buy the original A.R.E.S. if you're looking to get a good megaman like shooter.

I have more in a video here: <u>https://www.youtube.com/watch?v=YbkDaO-KrWg</u>. Why Early Access? \u201cI want to develop the game with the players! I know this sounds cliche but I really feel that building a "base" of a product, and finalizing it around the input from passionate members of the community is something I've always wanted to do."

- Words spoken by a dirty little liar.. interesting consept. crashes a lot on the map editor, but its still day one.. It's good. You should get it. But If you blow through this game in under 4 hours... you aren't doing it right. Be advised, there are no laser guns, zombie waves or anime girls. But you can manipulate time and space and solve Nikola Tesla's murder.
