Windows Media Player 12 adds a new media player experience that allows you to enjoy your favorite music, movies, and TV shows on your PC. It lets you view and listen to high-quality audio and video right on your computer, while delivering the smoothest playback available on Windows, with features like automatic album art and track titles and the ability to easily find and play the music you want to enjoy. With a built-in player, you can watch movies and TV shows from the Windows Store or stream movies or music from popular services, including Netflix, Amazon Video, YouTube, Facebook, and Google Play. And, of course, you can enjoy your videos on your mobile devices, using the same Windows-optimized playback experience as on your PC. By simply connecting your device to your PC, you can use the same view, touch, and remote control experience as on a larger screen. For the latest version of Windows Media Player, click [Learn more about this topic](#). Learn more about Windows Media Player 12. Applies to: Windows 8, Windows 8.1 A feature that lets you watch your favorite movies and TV shows on your PC has been upgraded in Windows 8 and Windows 8.1 to offer the best performance and quality. By default, Windows Media Player is pre-installed on the PC, so you don't need to install it separately. You can also download the Windows Media Player application from the Windows Store. You can now watch movies and TV shows on your PC from the same platform that you watch on your mobile devices and other devices, and you can also share video content with other Windows Media Player users. And, for devices that support high-resolution video, you can also enjoy video at the highest resolution possible. For the latest version of Windows Media Player, click [Learn more about this topic](#). Learn more about Windows Media Player. Microsoft's Edge browser now comes with built-in support for popular online music and video services, including YouTube, Vimeo, Vevo, and Spotify. You can start a video directly from within the browser, and even listen to music without having to leave the page. For the latest version of the browser, click [Learn more about this topic](#). Learn more about Microsoft Edge. Microsoft has updated Windows 10 to include a collection of new features for PC owners. While it's true that Windows is meant to be "Your PC. Your way," that doesn't mean the old way of thinking isn't still a part of Windows. Windows 10 has built- 82157476af
